Please amend the claims as follows:

LISTING OF CLAIMS:

Claim 1 (Previously presented). A process for coenzyme Q-10 (CoQ10)

production comprising introducing a mevalonate operon of a microorganism belonging

to the genus Paracoccus into a microorganism belonging to the genus Rhodobacter

and cultivating the modified Rhodobacter strain, wherein the mevalonate operon

comprises polynucleotides that encode MvaA (hydroxymethylglutaryl-CoA reductase),

Idi (isopentenyl diphosphate isomerase), Hcs (hydroxymethylglutaryl-CoA synthase),

Mvk (mevalonate kinase), Pmk (phosphomevalonate kinase), and Mvd

(diphosphomevalonate decarboxylase).

Claim 2 (Original). The process of claim 1, wherein R. sphaeroides is

used as the CoQ10 producing microorganism.

Claim 3 (Previously presented). The process of claim 1 wherein the

mevalonate operon of Paracoccus zeaxanthinifaciens is introduced into the

Rhodobacter strain.

Claim 4 (Previously presented). A process for producing coenzyme Q-

10 (CoQ10) which comprises culturing, in a medium, a microorganism of the genus

Rhodobacter into which the mevalonate operon of a microorganism of the genus

Paracoccus has been introduced, allowing CoQ10 to form and accumulate in the

culture and recovering CoQ10 therefrom, wherein the mevalonate operon comprises

polynucleotides that encode MvaA (hydroxymethylglutaryl-CoA reductase), ldi

Amendment Dated: October 3, 2007

Reply to Office Action Dated: June 4, 2007

(isopentenyl diphosphate isomerase), Hcs (hydroxymethylglutaryl-CoA synthase), Mvk (mevalonate kinase), Pmk (phosphomevalonate kinase), and Mvd (diphosphomevalonate decarboxylase).

microorganism of the Claim 5 (Previously presented). Α Rhodobacter containing the mevalonate operon of a microorganism of the genus Paracoccus, wherein the mevalonate operon comprises polynucleotides that encode MvaA (hydroxymethylglutaryl-CoA reductase), ldi (isopentenyl diphosphate isomerase), (mevalonate kinase), Pmk Hcs (hydroxymethylglutaryl-CoA synthase). Mvk (phosphomevalonate kinase), and Mvd (diphosphomevalonate decarboxylase).

Claim 6 (Original). The microorganism of claim 5 which is *Rhodobacter* sphaeroides.

Claim 7 (Previously presented). The microorganism of claim 5 containing the mevalonate operon of *Paracoccus zeaxanthinifaciens*.

Claims 8-9 (Cancelled).
